1. Threats are transferred to this sheet based on the priority order from the Likelihood Assessment (Sheet #1).
2. Transfer the Severity Impact Score for each Threat from the Severity Assessment (Sheet #2).
3. Add the Likelihood Score and Severity Score for each Threat. This provides the overall Risk Score for each Threat.
4. Identify the Priority Order based on the Risk Score where the highest Risk Score is the #1 priority, second highest Risk Score is the #2 priority, etc.
