

## Hazard Risk Assessment

Use a Check-mark to identify the hazards or threats that concern you for the planning location. If issue is not listed, add it to the bottom of the list. Next determine the order of the likeliness that they will occur and the potential severity by its overall impact. Calculate the Score and then identify the Planning Priorities from 1 to N.

1	2	3	4	5
	Likelihood (0=Not likely - 5=Certainty)	Severity (0=No Impact - 10=Devastating)	Score (Likelihood) x (Severity)	Priorities Highest score = highest priority
